

DIP KUMAR KAPAT

Senior Frontend Engineer | React, Next.js & TypeScript | Figma to Production UI | SaaS & Dashboard Interfaces

Kolkata, West Bengal, India | 9903359927 | dipkrkapat@protonmail.com

Portfolio: <https://dipkumarkapat.com/> | GitHub: <https://github.com/dipkapat> | WhatsApp @ 7439655501

PROFESSIONAL SUMMARY

Senior Frontend Engineer with 18+ years in web/UI development, including 5+ years building production React and Next.js applications. Owned frontend architecture and delivery for 25+ modules of an enterprise school-management platform (Adhyan Digital) end-to-end - from Figma design through component build to production release - used by 10-15 schools and around 5-8 thousands of end users (administrators, staff, and parents/students), largely self-directed, with minimal day-to-day oversight, which translates directly to distributed and asynchronous team environments. Combines a strong visual-design background (Figma, wireframing, prototyping) with hands-on React/Next.js/Tailwind engineering, and has adopted AI-assisted development workflows (Claude Code, Open Code, Antigravity, Cursor, Trae) to speed up implementation without sacrificing code quality. Currently seeking a Senior Frontend Engineer / UI Engineer role.

CORE SKILLS

Frontend Engineering: React JS, Next.js, Typescript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Component Architecture, Responsive Design, Git/GitHub

UI/UX & Design: Figma, wireframing, high-fidelity prototyping, design systems, design-to-code conversion, Adobe Photoshop, Illustrator, Affinity Designer

Libraries & Tooling: Shadcn UI, Flowbite, Framer Motion, Figma-to-React conversion

AI-Assisted Development: Claude Code, Cursor - used to accelerate component generation, refactoring, and debugging within a production codebase

SELECTED PERSONAL PROJECTS

- **LoanLens** - loan comparison/calculator web app built with React/Next.js.
Link: <https://loanlens-theta.vercel.app/>
- **Pulse Metrics** - analytics/metrics dashboard interface.
Link: <https://pulse-metrics-beta.vercel.app/>
- **Veterinary Appointment Booking** - booking/scheduling application for a clinic workflow.
Link: <https://veterinary-appointment-booking.vercel.app/>
- **Saints Paradise Cafeteria** - cafeteria/food-ordering web app.
Link: <https://saints-paradise-cafeteria.vercel.app/>
- **AI Content Generation Tool** - AI-powered content generation interface.

PROFESSIONAL EXPERIENCE

Senior Frontend Developer (UI/UX, React Design Conversion) 03 Aug 2020 – 30 Apr 2026

Adhyan Digital Pvt. Ltd., Kolkata | The company restructured its engineering division

- Owned UI architecture and frontend delivery for 25+ modules - spanning academics, admissions, finance, HR, transport, and analytics - within a production school-management platform used by 10-15 schools and 5-8 thousands of end users (administrators, staff, and parents/students), largely independently.

- **Admission & Fees modules:** built the end-to-end multi-step admission workflow and fee-collection UI, converting Figma flows into production React/Next.js components with real-time validation - digitizing a previously paper-based admission process and reducing manual fee-reconciliation errors.
- **Student Analytics & Reports:** built data-heavy dashboard and reporting screens (tables, charts, filters) used by school administrators to track academic and attendance performance.
- **Employee Management & Payroll:** delivered the HR/payroll module UI, including role-based views for administrators vs. staff.
- Converted high-fidelity Figma designs into responsive, production React components using React JS, Next.js, and Tailwind CSS; accelerated component development using Flowbite and Shadcn UI across the product suite.
- Implemented micro-animations and UI transitions with Framer Motion to improve perceived responsiveness and user engagement.
- Diagnosed and resolved HTML/CSS/Tailwind cross-browser issues in live production environments.
- Created wireframes and interactive prototypes in Figma directly with stakeholders, then implemented them - owning the full design-to-code pipeline.
- Adopted AI-assisted development tools (Claude Code, Cursor) to speed up repetitive component generation and refactoring while maintaining production code standards.
- Collaborated directly with backend developers and product managers on API integration and release planning; applied on-page SEO fundamentals (semantic HTML, metadata) across the product's public-facing pages.

Career Break

Aug 2019 – Aug 2020

COVID-19 pandemic lockdown in India - no employment during this period

HTML/Web Designer

Feb 2018 – Aug 2019

Vawsum Schools Pvt. Ltd., Kolkata

- Designed and built responsive web pages and UI layouts (HTML5/CSS3) for an education-technology platform.
- Translated wireframes and visual specs into clean, semantic, cross-browser-compatible HTML/CSS.
- Worked directly with product and engineering teams on frontend-backend integration.

Early Career - Web/UI Designer

2006 – 2018

Apex Division · Max Mobility · Ericsson (contract) · Designclature · DPS Technologies · NetWest Solutions · Shiv Shakti · Skill Hut, Kolkata

- Progressed from Web Designer to Senior Web/UI Designer across 8 roles, delivering HTML/CSS/JS websites and UI layouts for clients across telecom, mobility, education, and general commercial sectors.
- Built the visual-design and HTML/CSS foundation - wireframes, mockups, cross-browser layouts - that later underpinned the transition into React/UI engineering.

EDUCATION

- B.Sc. (Pass) [Phy, Chem, Math] - University of Calcutta, 1998
- Higher Secondary (10+2) - WBCHSE, 1996
- Secondary (10th, ICSE) - St. Augustine's Day School, Barrackpore, 1994

CERTIFICATIONS

- Advanced Diploma in Multimedia (2.5 years) - Arena Multimedia
- Diploma in Information Technology (2 years) - NIIT

LANGUAGES

English, Hindi, Bengali, Nepali (Spoken)
